

Environmental Services For Storage Tank Owners

Compliance with federal, state and local environmental laws is no simple matter.

Storing and dispensing hazardous materials may not be your core business, but it can consume both your time and financial budget. Penalties for non-compliance and the repair and clean-up costs from a leak can quickly reach into the tens-of-thousands of dollars.

Blue1 and our partner Tanknology have the experience and capabilities necessary to help you efficiently and cost-effectively manage these complex regulatory and safety requirements for all your sites.

Inspections and Certifications

EPA regulations for aboveground storage tanks requires annual and periodic inspections. In addition, our comprehensive compliance programs provide you with professional guidance for all your underground storage tanks as well.

Testing and Repairs

We provide quick, accurate and cost-effective tank, line and leak detection testing with minimal disruption to facility operations. Testing may also include sumps, vapor recovery, secondary containment and spill buckets.

Emergency Preparedness and Compliance Assistance

Do not get caught with contaminated fuel, clogged filters and inoperative generators. Fuel filtering and tank cleaning will actually help save

extraordinary expenses in advance of storm season. We have the experience to help you manage all of these potential problems.

Spill Prevention (SPCC) and Storm Water (SWPPP) Plans

The EPA requires a formal plan to prevent oil stored on premises from entering navigable waterways. This Spill Prevention Plan is required for any facility that stores an aggregate greater than 1,320 gallons aboveground or greater than 42,000 gallons underground. A Storm Water Pollution Prevention Plan minimizes the negative impact of storm water run-off of pollutants and sediments from the premises to the environment. Your truck terminal, shop, fueling facility, wash bay or storage dock all require such a plan.

Let us help you maintain environmental compliance, protect your assets and avoid costly fines and penalties.
